Vivaterra laundry and trash bags

Laundry will probably never be completely fun until they figure out how to make it clean itself. But Viva Terra's one-of-a-kind, brightly-colored bags at least make the task aesthetically pleasing. Composed of recycled fabric from rice and feed bags and made by hand at a fair trade cooperative in Cambodia, the company produces the handy sacks in trash-can size too. Doing laundry may still be boring, but at least you will be doing it in style.

Available online at Vivaterra.com
