Tree Hugger

Amazon Tree Climbing

Monkey bars, trees, chairs, corporate ladders...we are born to be climbers. And Amazon Tree Climbing taps into the inner-Spidey in all of us. This sustainable travel company takes groups of six (they keep the numbers small to minimize impact on the environment) into the heart of the Amazon Rain Forest and guides them up trees as tall as 70 meters – where you can view the best birds, animals, and plants that the tropical forest has to offer. You can choose between one- or six-day itineraries that also include boat trips exploring the dry forest ground, area beaches, and river life. Expeditions are guaranteed to be more exciting than climbing that jungle gym.

Get your climb on at amazontreeclimbing.com.
